**Subject:** DELIBERATIVE - CLOSE HOLD glyphosate update  
**Attachments:** glyphosate\_issue\_paper\_evaluation\_of\_carcinogenic\_potential\_final\_09\_16\_16.pdf;  
glyphosate\_sap\_charge\_questions\_-final.pdf

Hi everyone: I attached the final charge and white paper that are now publicly available.

I have looked at all of the final edits that were made to the charge and white paper and compared them to the last suggestions that we had. If anyone is interested in "compare" documents, please let me know and I will forward to you.

For the white paper and charge, many of our final suggested edits were accepted.

We had a major impact on the charge and the document in helping OPP be transparent in their analysis and decision-making. It was a very good thing for us to all work together. Thank you everyone!

## In This Update:

### Scientific Advisory Panel to Meet on Cancer Potential of Glyphosate

The Federal Insecticide, Fungicide, and Rodenticide Act Scientific Advisory Panel (SAP) will meet October 18-21, 2016, to consider and review a set of scientific issues being evaluated by the Environmental Protection Agency (EPA) regarding EPA's evaluation of the carcinogenic potential of the herbicide glyphosate.

EPA has published meeting materials in docket [EPA-HQ-OPP-2016-0385](#) at [www.regulations.gov](http://www.regulations.gov), including a [glyphosate issue paper](#) with the Agency's proposed classification that glyphosate is not likely to be carcinogenic to humans at doses relevant for human health risk assessment. The charge to the SAP is also posted on the [Scientific Advisory Panel](#) website.

The peer review panel has 90 days to provide EPA with a written report. Once EPA has reviewed the SAP report and made any appropriate changes to our risk assessment, we intend to release all the components of our full human health and ecological risk assessments for a 60-day public comment period. We are currently scheduled to publish the human health and ecological risk assessments in spring 2017.
